Defendoor RETRACTABLE SCREENS

Reliable Roller Screen System

DEFENDOOR RELIABLE ROLLER

The Defendoor Reliable Roller screen door system is our latest retractable flat mesh screen, featuring an ultra-low 12mm bottom track for a sleek appearance and easy everyday use.

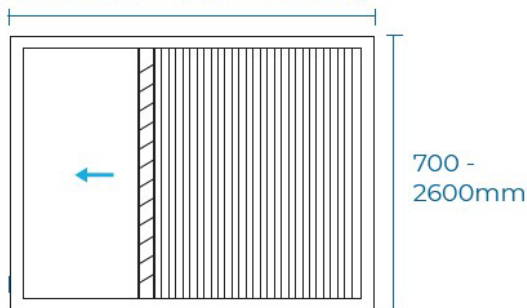

Its dual cord and spring system allows smooth operation and can stop at any position, making it ideal for windows and doors.

The welded zip-guided mesh stays securely within the side tracks, providing excellent insect protection, superior sealing, and strong wind resistance—perfect for coastal and high-wind areas.

A semi-detachable cassette allows for easy maintenance and future mesh replacement, while a range of mesh options, including pet-resistant and high-visibility mesh, lets you tailor the screen to your needs.

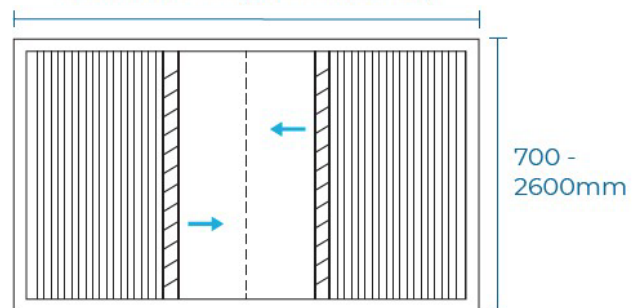

600-2600mm(72mm cassette)
600-3500mm(92mm cassette)

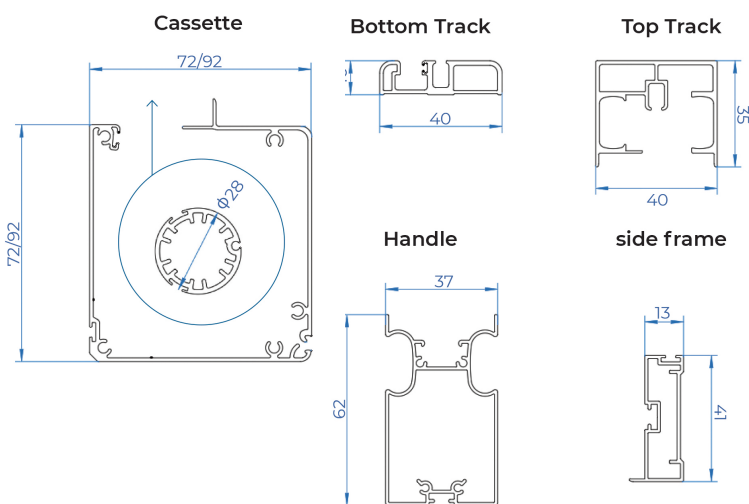

Single Slide

1200-5200mm(72mm cassette)
1200-7000mm(92mm cassette)

Double Slides Centre Closing

DEFENDOOR RELIABLE ROLLER WINDOW

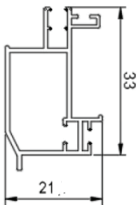

Our custom-made retractable fly screens provide effective insect protection while maintaining excellent airflow and clear outdoor views.

The screen retracts neatly into its housing when not in use, creating a clean, modern appearance. Available with High-Transparency Mesh for maximum visibility and airflow, Pet-Resistant Mesh for added durability, and lockable or non-lockable options to suit your needs.

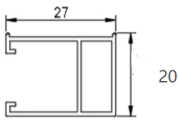

Ideal for awning, casement, and double-hung windows, these screens combine style, functionality, and long-lasting performance.
